1. The Nasaky Chemical Factory located in the Nitra River Valley nine km south-east of Prievidza (Q49/T 97) is producing mustard gas. The gas is stored in 50 liter containers in an underground storehouse about two km east of the Labota River.
2. The gas is processed only until its penultimate stage and then stored, because if stored in its finished state it would deteriorate.
3. The factory, built sometime before 1938, is divided into a civilian and military section, and employs about 600 chemists and an undisclosed number of political prisoners from the labor camp at Novaky.
